Seasoned Software Developer with a 4-year track record in web application development leveraging .Net technologies, complemented by 3 years of proficiency in crafting mobile applications using Flutter and Dart. A total of 7 years of proficiency in translating business requirements into functional specifications and effectively managing teams to ensure timely project delivery. Experienced in client management, project transformation, and UAT support. Microsoft Certified in Azure Fundamentals, demonstrating expertise in cloud infrastructure and services.

SKILLS

- Flutter and Dart
- Firebase
- .Net, .Net Core, C#
- JavaScript, HTML, CSS
- Visual Studio Code, Android Studio
- Git

EXPERIENCE

Flutter Developer
Softel Tech | Nov 2022-Jun 2023
- Worked on creating a Computerized Maintenance Management System for managing maintenance tasks of industrial equipment, effectively improving productivity and reducing downtime
- Focused on front-end development, business logic, and API consumption.

Sr. Software Developer
R Systems | Apr 2022-Dec 2022
- Assisted in developing an application that streamlined meeting scheduling and management, significantly improving collaboration and productivity.

Software Developer
Addicor Technologies | Apr 2020-Apr 2022
- Developed a personalized party experience mobile application using Flutter/Dart, Firebase, etc.
- This innovative app allowed users to select restaurants, clubs, and lounges based on individual preferences such as ambience, music, and type of food/drinks served
- The application also provided information about offers and deals available at these places, using location-based suggestions to ensure relevancy and convenience for the users.

Technology Analyst
Infosys Ltd | May 2018-Aug 2018
- Worked on Robotic Process Automation, helping streamline and automate business processes, thereby increasing operational efficiency and reducing costs.

Software Developer
Infovision Labs | Dec 2016-May 2018
- Designed and developed an in-house product as a solution to Human Resource Activities System in the organization, reducing the time spent on HR tasks and improving employee satisfaction.

System Engineer
Nihilent Technologies | Apr 2014-May 2016
- Developed and maintained a Windows Desktop Application for South African Breweries, enhancing business operations and productivity.

Software Programmer
Sang Infotech | Apr 2013-Mar 2014
- Worked on developing a Supply Chain Management System for a US-based organization (Art Guild)
- Assisted in creating a more efficient supply chain, reducing costs and improving delivery times.

EDUCATION AND TRAINING

Master of Business Administration (Marketing)
Sinhagad Institute of Technology and Science

Bachelor of Engineering (Computer Science)
Sant Gadge Baba Amravati University

Diploma in .Net Technologies
NIIT
